Technical Skills

Languages: Python, Java, C++, C, SQL, R

Backend: Django, REST APIs, NoSQL, PostgreSQL

Tools: NumPy, Pandas, Scikit-learn, Matplotlib, Jupyter, Git, Linux

Concepts: Statistical Modeling, Data Visualization, OOP, Algorithms

Projects

eXAI: Credit Card Default Classifier

Personal Project

May 2026

- Developed an end-to-end machine learning pipeline in Python to predict consumer credit default risk using financial data.
- Built **ETL** and **preprocessing** workflows including **one-hot encoding**, **feature scaling**, and train/test evaluation **pipelines**.
- Implemented and evaluated classification models including **Random Forest** and **K-NN** using **Scikit-learn**.
- Used **SHAP** explainability analysis to generate **auditable** feature attribution and improve model interpretability for risk predictions.

Crash Tested

December 2025

UBC Data Quest Hackathon, Vancouver, BC

- Led development of a Python-based **classification pipeline** analyzing 30,000+ business and economic records.
- Performed large-scale data cleaning, preprocessing, statistical analysis, and feature engineering using **Pandas** and **NumPy**.
- Evaluated economic recession indicators through **quantitative modeling** and **exploratory data analysis**.

Anderson-Darling Normality Analysis

Personal Project

March 2024

- Developed an **object-oriented** statistical analysis engine in **Java** for evaluating dataset normality using the Anderson-Darling test.
- Implemented **numerical approximation methods** and summary statistic calculations for **quantitative data analysis**.

Release

March 2026 – June 2026

Personal Project

- Full-stack iOS mobile application, built for students by students with 50+ daily users.
- Received overwhelmingly positive feedback from the user base, saved users over 750 hours of screen time.

WORK EXPERIENCE

Data Consultant

Across Indonesian Seas, Vancouver, BC

June 2026 – Present

- Design and develop the AIS **ontology** to standardize business entities, relationships, and **data workflows** across the organization.
- Apply **statistical methods** and **forecasting techniques** to build **predictive models** that support data-driven business decisions and operational planning.

Research Assistant

May 2026 – Present

UBC Department of Mathematics, Vancouver, BC

- Summer research concerned with algebraic combinatorics, applying techniques from linear algebra, abstract algebra, and finite field theory to problems in graph theory.
- Working independently on mathematically rigorous problems requiring analytical reasoning, technical communication, and iterative experimentation.

Seasonal Chef

The Spot on the Dock, Burlington, VT

May 2024 – June 2026

- Served as a swing line cook across multiple kitchen stations in a high-volume restaurant environment, maintaining operational efficiency during peak service hours.
- Trained and onboarded new line cooks on kitchen procedures, workflow coordination, and service standards.

Media Director

December 2024 – April 2026

UBC Brazilian-Jiu Jitsu, Vancouver, BC

- Developed and managed club communications by creating informational content, coordinating with Canadian BJJ organizations, collaborating with executives, designing merchandise, and supporting event organization to promote a consistent club ethos.

EDUCATION

Combined Major in Computer Science and Statistics

September 2023 – May 2028

University of British Columbia, Vancouver, BC

- Average: 82.6% ~ 3.8/4.2 GPA ~ Dean's List

Relevant Coursework: Applied Machine Learning, Statistical Modeling, Applied Linear Algebra, Probability, Multivariable Calculus, Computer Systems, Data Structures & Algorithms, Principles of Software Design, Relational Databases, Relationships in Data

CERTIFICATION

Google Cyber Security

Google Cert • 2025

Digital Marketing

Hubspot • 2024

SQL basics Certificate

Hackerrank • 2025

Python basics Certificate

Hackerrank • 2025

UBC Science Co-op

science.coop@ubc.ca | 604-822-9677
